

# PRESS RELEASE

## Peabody Australia join the Forwood Critical Risk Management Community

**Forwood is thrilled to announce that Peabody have joined the growing community of organisations applying a laser focus on fatality prevention, through the management of critical controls within Forwood’s Critical Management Solution.**

### Background

Safety is Peabody’s first value; committing to safety and health as a way of life. Upon review of current system capability as well as a market sweep, Forwood CRM was evaluated and identified as the leading critical control management tool on the market. Forwood’s turn-key solution provided Peabody immediate benefit through the standardised global benchmark checklists, which verify and record critical control effectiveness above and below ground using Forwood’s online/offline App. The solution ensures that robust critical controls are implemented for all tasks with a credible fatality risk. CRM is a proven fatality prevention solution that applies Forwood’s patented 3-tiered methodology using cutting-edge technology.

---

*“Peabody Australia selected Forwood CRM to manage critical controls outside of our current system. With full functionality available now, it saves us a tonne of development time and money, that we can invest into strengthening our fatality prevention program. The site personnel love its simplicity, which makes a difference where it counts most, at the ‘coal face’ “.*

Shane Apps  
Senior Manager – Health, Safety and Training

---

### About Peabody

Peabody is a leading coal producer, providing essential products for the production of affordable, reliable energy and steel. Peabody Australia operates 6 underground and surface coal mines across Queensland and New South Wales, producing a range of metallurgical and thermal coals for the domestic and international markets.

### About Forwood

Established in 1995, Forwood is an innovative, values-driven company with a laser focus on fatality prevention. Combining in depth industry knowledge with leading edge technology and the latest thinking and approaches in safety tools and techniques; that deliver outstanding results. Forwood is about making the world a safer place to work by providing proven safety solutions wherever human life is a risk.
